About:

DJ'ing since 1999, I bring years of experience combined with a passion for music and rocking a crowd. A graduate of the University of California, Irvine, as a Social Science Major, I also work as the Sales Manager for a software company. I understand the rules of business and treat DJ'ing with the same level of professionalism. Not only do I provide the music and set the vibe for an event but I also make sure it is successful from start to finish.

Music:

Hip hop, pop, top 40, mash-ups, R&B, reggae, dancehall, rock, house, electro, trance, 80's, oldies, and more
