**APPLIED DATES:**

Vehicles built before: October 6, 2008

**IF YOU CONFIRM:**

While braking, especially when braking at highway speeds:

- the steering wheel shakes  
and/or
- the body vibrates  
and/or
- the brake pedal pulsates (also known as "Brake Judder")

**IMPORTANT NOTES:**

- If incident occurs when cruising or coasting (not braking) it is not "Brake Judder," and may be tire/wheel related. Refer to ASIST for further diagnostic assistance.
- DO NOT CONFUSE "Brake Judder" with the rapid consistent-speed pedal pulsation that may be felt and only occurs when ABS is activated during hard braking or on slippery road surfaces. In contrast, the pedal pulsation of "Brake Judder" may occur with light to moderate braking experienced during normal driving conditions, and the pulsation rate will vary (faster or slower) with vehicle speed.
- The purpose of "ACTIONS" (on page 2) is to give you a quick idea of the work you will be performing. You MUST closely follow the entire Service Procedure as it contains information that is essential to successfully completing this repair.

Infiniti Bulletins are intended for use by qualified technicians, not 'do-it-yourselfers'. Qualified technicians are properly trained individuals who have the equipment, tools, safety instruction, and know-how to do a job properly and safely. NOTE: If you believe that a described condition may apply to a particular vehicle, DO NOT assume that it does. See your Infiniti dealer to determine if this applies to your vehicle.
